Meeting Venue:

ICLO Teaching & Research Center  
Verona, ITALY

January 31 – February 1, 2020

Equinox® co-innovation laboratories focus on current advances and new insights in shoulder arthroplasty that can improve patient outcomes. This interactive program animated by renowned surgeon faculty features innovative implant solutions, instrumentation and surgical techniques.

Let's enhance our exposure techniques in a cadaveric workshop that also emphasizes the axillary nerve and retractor placement and become skilled at soft tissue releases with the Equinox instrumentation.
